

OTOLARYNGOLOGY SENIOR ELECTIVE  
Neil Chheda, MD  
Course Director

Name: \_\_\_\_\_

Senior Medical Student Rotation

This information handout is for your use throughout the rotation. At the end of the rotation you will be asked to turn in this page for your grade to be issued:

1. Returned borrowed books (have Nicolle sign below)

\_\_\_\_\_

2. Case report submitted (only for 4week rotations)

\_\_\_\_\_

Return this sheet to Nicolle in the ENT office, M228.  
Thank you.

\_\_\_\_\_

## **GETTING STARTED**

Nicolle will generate a schedule for your rotation. You will be assigned to work with one of the ENT teams each week, rotating with the different ENT physicians in clinic. If you have particular interest in a given area please let Nicolle and/or Dr. Chheda know before the rotation starts. Ample time for reading and assisting in the OR will be provided. Please come to the Academic office (M2-228) on or before 8AM the Monday your rotation starts. Nicolle will help you contact the senior resident on your first service so that you know where to meet the team for rounds your first day on service. It is also very important that you read about the surgical cases including those you will see on your first day.

## **COURSE REQUIREMENTS**

1. Participate in all clinic and didactic activities.
2. Completion of the course objectives
3. Coverage of the majority of core topics with the faculty or residents & documentation sheet turned in at the end of your rotation
4. Return head mirror loaned to you.

## **OBJECTIVES**

- Improve understanding of otolaryngologic pathology and normal variants
- Improve diagnostic skills for otolaryngologic pathology

General head and neck exam

Mirror examination of the upper aerodigestive tract

- Exposure to office-based otolaryngologic procedures, both diagnostic & therapeutic
  - Foreign body removal
  - Cerumen disimpaction
  - Flexible laryngoscopy
  - Fine needle aspiration
- Improve understanding of otolaryngologic laboratory evaluations, including Behavioral Audiometry and Tympanometry
- Establish evaluation and treatment algorithms for otolaryngologic pathology, including need for surgical referral
- Develop a sound fund of knowledge for the core subjects listed below:

## **CORE SUBJECTS**

### Ear

- Otitis media (including cholesteatoma)
- Otitis externa
- Hearing loss
- Dizziness
- Facial nerve disorders

### Nose

- Epistaxis
- Rhinitis
- Sinusitis & nasal polyposis
- Chronic obstruction

### Throat

- Pharyngitis & tonsillitis
- Sleep apnea
- Hoarseness
- Dysphagia
- Upper airway obstruction (Epiglottitis, Subglottic stenosis, Respiratory papillomatosis)
- Cancer

### Neck

- Neck masses
- Cancer

### Head and Neck Trauma

- Facial fractures and lacerations
- Penetrating trauma

## **LECTURES**

All students should attend Otolaryngology department resident didactic sessions and lectures when their schedule allows. A schedule will be provided in your orientation packet.

**Students on a 4 week rotation will be encouraged to complete a case report on a topic or patient of their choice in order to receive a grade of honors. The submitted case report should be of suitable quality and format for submission to a national ENT journal and must be submitted to both Dr. Chheda and Nicolle by the last day of the rotation.**

### \*\*\*\*\*Recommended Reading

You may borrow Ear, Nose, and Throat Diseases, a Pocket Reference, by W Becker, HH Naumann, & CR Pfaltz. It is a brief primer on otolaryngology. Introductory textbooks are necessarily not encyclopedic. You should seek out additional sources of information, such as more topic-specific textbooks and journal articles. The Online Text section of the web contains other suggested information sources and references.

## **OTOLARYNGOLOGY EXAMINATION**

One of the most important things that you should take away from this rotation is the "head & neck" exam. Aside from the otoscope, the instruments used in the otolaryngology clinic are different from those used in most other clinics. This starts with the head mirror. Nicolle will loan you a head mirror, they are fragile, please be careful. If you do not return the mirror loaned to you, you will not receive credit for this course.

Even though you may have had some exposure to the head and neck examination during your first year of medical school, you should have a senior otolaryngology resident, faculty member, or physician's assistant go over this with you again. Please ask one of these members of your first assigned service to go over the head and neck exam with you right away. The sooner you get started, the more you will learn.

### Call

Students are not required to take call but should participate completely with the service activities. If you have an interest in taking call with the residents or seeing patients in the emergency room with the residents, let the junior resident on call know.

### Schedules

Your rotation will be divided into clinic experiences with various subspecialty services: Head and Neck, Otology, Pediatrics and Plastics. If you have a particular interest in a given area please let Nicolle know before the rotation starts.

### Dictation

As a result of changes in the medicolegal world, the attending physician, or an involved resident or physician assistant must do dictation. When in a new clinic please discuss with the attending what their protocol is for junior medical students in their clinic.
